

Our children start learning English at the age of four. They are able to make short phrases and sentences. Children like their lessons because they are funny and joyful. Children sing songs, guess riddles, play different games, perform sketches. At the lessons we use toys, cards, pictures and tape-recordings. On holidays our children present performances for their parents.

Children study English for three years. By the end of this term they know about 400 words. They know how to name people, animals, toys, fruit and vegetables, products, table-ware, colours, furniture, school objects, kinds of sport, professions, transport, musical instruments, clothes and others. They can say a few words about themselves, their family, hobbies, toys, pets, weather.
